

Griffin C. Hood - Software Engineer

Needham MA 02492 ♦ 781-771-0008 ♦ griffinhood@verizon.net
ghood97.github.io ♦ github.com/ghood97

Software Engineering Skills

- **Front-end:** JavaScript, jQuery, React, Sass, Bootstrap, HTML, CSS
- **Back-end:** Ruby, Rails, PostgreSQL, Node.js, Express, MongoDB, Java, C#, Python
- **Tools:** Git, Visual Studio, Microsoft Office
- **Operating Systems:** Windows, Mac OS, iOS, Linux

Experience

Software Engineering Fellow, General Assembly Sep 2019 - Dec 2019

- **Tic-Tac-Toe:** Developed a Tic-Tac-Toe application that communicates with a Rails API and includes user authentication, JavaScript, jQuery, HTML, and SASS
- **Inventix:** Built a full-stack inventory management application with a Ruby on Rails back end and a JavaScript front end that protects against cross-site scripting using Handlebars
- **Ask-Nicely:** Collaborated with a team of 4 developers to build a survey taking application using an Express.js and MongoDB back end
- **TeamNotiphy:** A React application for sports teams where users can create posts and comments and can create schedule events.

Staging Analyst, FoodTec Solutions, Needham MA May 2019 - Oct 2019

- Built and configured custom computers and equipment to run an advanced POS system
- Remotely ran upgrades on customer machines to implement the latest software release
- Maintained network and hardware to keep customer businesses operational

Assistant Coach, Needham High School Wrestling, Needham MA Dec 2017-Present

- Coached varsity level student athletes in folk-style and freestyle wrestling
- Built a React app that the organization uses to communicate between athletes, parents, and coaches and track the teams progress throughout the season

Sales Assistant, Harvey's Hardware, Needham MA Jun 2014 - Nov 2016

- Provided product functionality, advice, and information of products for walk-in and phone customers
- Assisted in incoming inventory verification stocking of in-store displays
Ran POS System (Eclipse) to check out customer purchases and update inventory

Education

Software Engineering Immersive, General Assembly, Boston MA Sep 2019-Dec 2019

- A three-month intensive software engineering boot camp mainly focused on single-page web-based application development

Massachusetts Bay Community College, Needham, MA 2016-2018

- Java Programming I, New Product Development, Java Programming II
